

## **Construction and deconstruction**

### **Logistics/Forklift**

For the delivery or collection of stand materials at your stand, please contact:

CEVA Showfreight Domestic team  
[events.nl@cevalogistics.com](mailto:events.nl@cevalogistics.com)  
088-0283100

Trucks and cars are not allowed into the location, it is not allowed to deliver goods to the stand with your own forklifts/cage monkeys etc. It is not possible to store goods or have them stored in the location during the exhibition days.

PLEASE NOTE: the aisles are 2.85 m wide and are not in a straight line, our advice is to take this into account by not packing stand materials too large so that they can be easily maneuvered across the exhibition floor.

### **Deconstruction**

After the official closing, we will immediately start with making clear of the entrance doors and other activities for rapid clearance. You are advised not to leave small and valuable goods unattended at your stand.

### **Storage pallets & packing material**

Unfortunately, it is not possible to have pallets and packaging material stored before, during and after the exhibition days.

## **During the event**

### **Valuables**

Do not leave your stand unmanned during the event and take care of your precious stuff. Outside opening hours we advise you to safely store your belongings or take them home. MaterialDistrict is not liable for loss or theft of your property during the event and during the construction and deconstruction period.

### **Waste**

Stand builders and/or participants are responsible for the removal of the waste that they cause during construction and deconstruction. Any waste left behind will be removed by us at the expense of the exhibitor. During the event, the waste can be placed in a garbage bag in the aisle at the end of the day. This will be removed by the cleaning crew in the evening. (Placement only after the close of the show.)
